

LOVE SUPPORT UNITE

MAY REPORT 2025

**“This is more than aid...
it’s investment in
resilience, dignity, and a
better tomorrow.”**

In May 2025, Love Support Unite is thrilled to share the latest progress from our partners at African Vision Malawi, who continue to make meaningful strides in Health, Education, and Sustainable Agriculture. Together, we’re reaching the most vulnerable with life-changing support that builds lasting resilience.

**These achievements are only possible
because of supporters like you. Whether
you're reading this as a donor, partner, or
friend of the mission... your support powers
real change.**

Education is the foundation of lasting change - and in Malawi, it's a lifeline to opportunity.

Each step we take is helping unlock opportunity through education - for children, families, and entire communities.

In May, our education programmes in Malawi continued to create meaningful impact - from early learning to adult empowerment. Over 500 children attended our 13 Early Childhood Development (ECD) centres, where we supported daily meals and learning through the distribution of teaching materials and feeding utensils. Five centres harvested their maize and soya crops, now safely stored to reduce losses and support sustainable nutrition. Meanwhile, adult literacy graduates in Biwi turned knowledge into income through soap-making cooperatives, and preparations began for two new literacy centres in response to high community demand.

Monthly Highlight | Adult Literacy

Two soap-making cooperatives reported strong early progress after our 2024 adult literacy business courses! Products are now selling in local markets, and the co-ops have already earned MWK 61,500 in just two months.

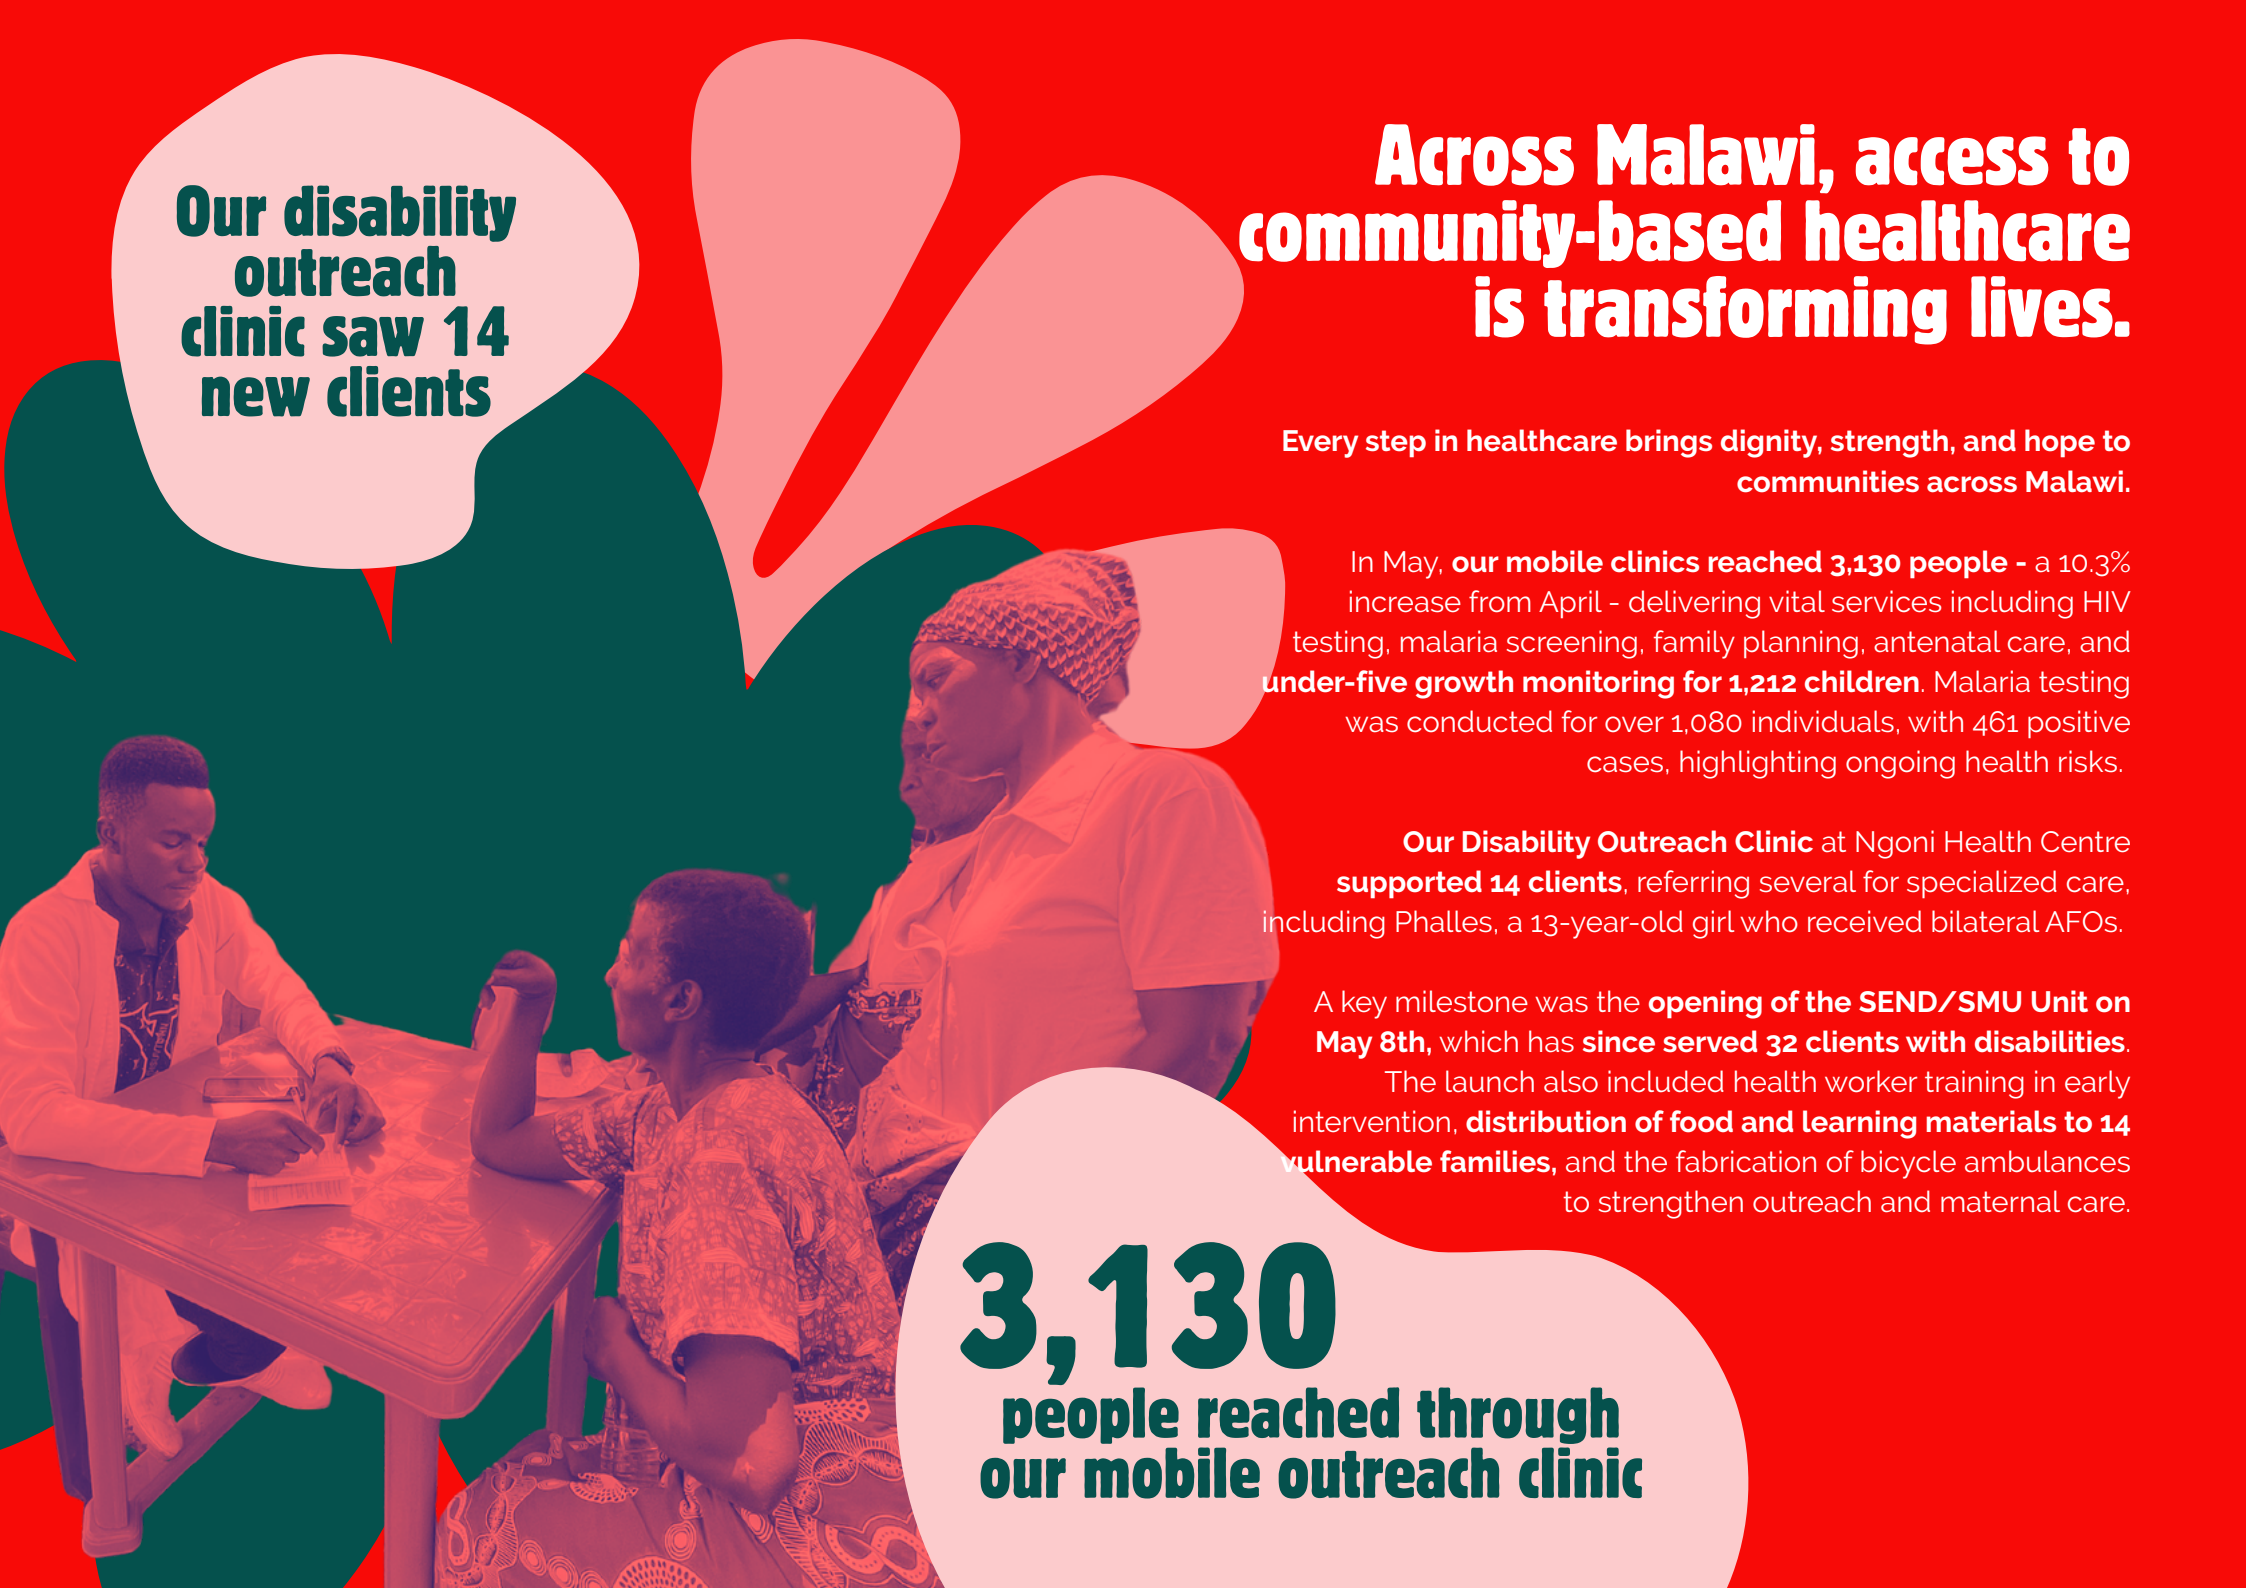

"Adult literacy is not just about reading it's unlocking economic potential."

5

ECD centres (Kafutwe, Mseteza, Mteza, Mkukhu, and Chipasula) successfully harvested their maize and soya crops.

516 little learners aged 0-5 attended school at our Early Childhood Development Centres

**Our disability
outreach
clinic saw 14
new clients**

Across Malawi, access to community-based healthcare is transforming lives.

Every step in healthcare brings dignity, strength, and hope to communities across Malawi.

In May, **our mobile clinics reached 3,130 people** - a 10.3% increase from April - delivering vital services including HIV testing, malaria screening, family planning, antenatal care, and **under-five growth monitoring for 1,212 children**. Malaria testing was conducted for over 1,080 individuals, with 461 positive cases, highlighting ongoing health risks.

Our Disability Outreach Clinic at Ngoni Health Centre **supported 14 clients**, referring several for specialized care, including Phalles, a 13-year-old girl who received bilateral AFOs.

A key milestone was the **opening of the SEND/SMU Unit on May 8th**, which has **since served 32 clients with disabilities**.

The launch also included health worker training in early intervention, **distribution of food and learning materials to 14 vulnerable families**, and the fabrication of bicycle ambulances to strengthen outreach and maternal care.

3,130

our mobile outreach clinic**

All of our farmers in Ngwizi village harvested between 1 and 4 tons of maize each in May.

Zero-interest seed loans are transforming farming in Malawi - breaking poverty cycles, improving food security, and restoring soil, all without burdening farmers with debt.

Sustainable Family Farms | Ngwizi Village Chancholo Centre

Our team visited Ngwizi village to check on harvests from the Sustainable Family Farms project. Nearly all participating families completed their maize harvests and stored them in granaries, preparing for shelling and loan repayment. All of our farmers in Ngwizi village harvested between 1 and 4 tons of maize each in May.
