

LOVE SUPPORT UNITE SEPTEMBER REPORT 2026

September brought steady care and encouraging progress across our Malawi programmes, from mobile clinics reaching over 1,700 people to families growing in confidence and self-reliance.

Mobile Outreach Clinics

- All 10 mobile outreach sites ran in September with Lilongwe District Health Office, reaching 2,074 clients. That's up from 1,743 in August and brings the total since April to 12,021
- 1,268 children under five were seen, including 1,238 growth monitoring checks. Immunisations included polio (227), measles (206), PCV (199), penta (196) and IPV (153)
- 199 malaria vaccinations and 76 typhoid vaccinations were given. Both appear in the clinic figures for the first time this month
- Family planning: 343 women received Depo Provera/Sayana injections, 24 had implants inserted (22 Implanon, 2 Jadelle), 17 received pills and 1,056 condoms were distributed

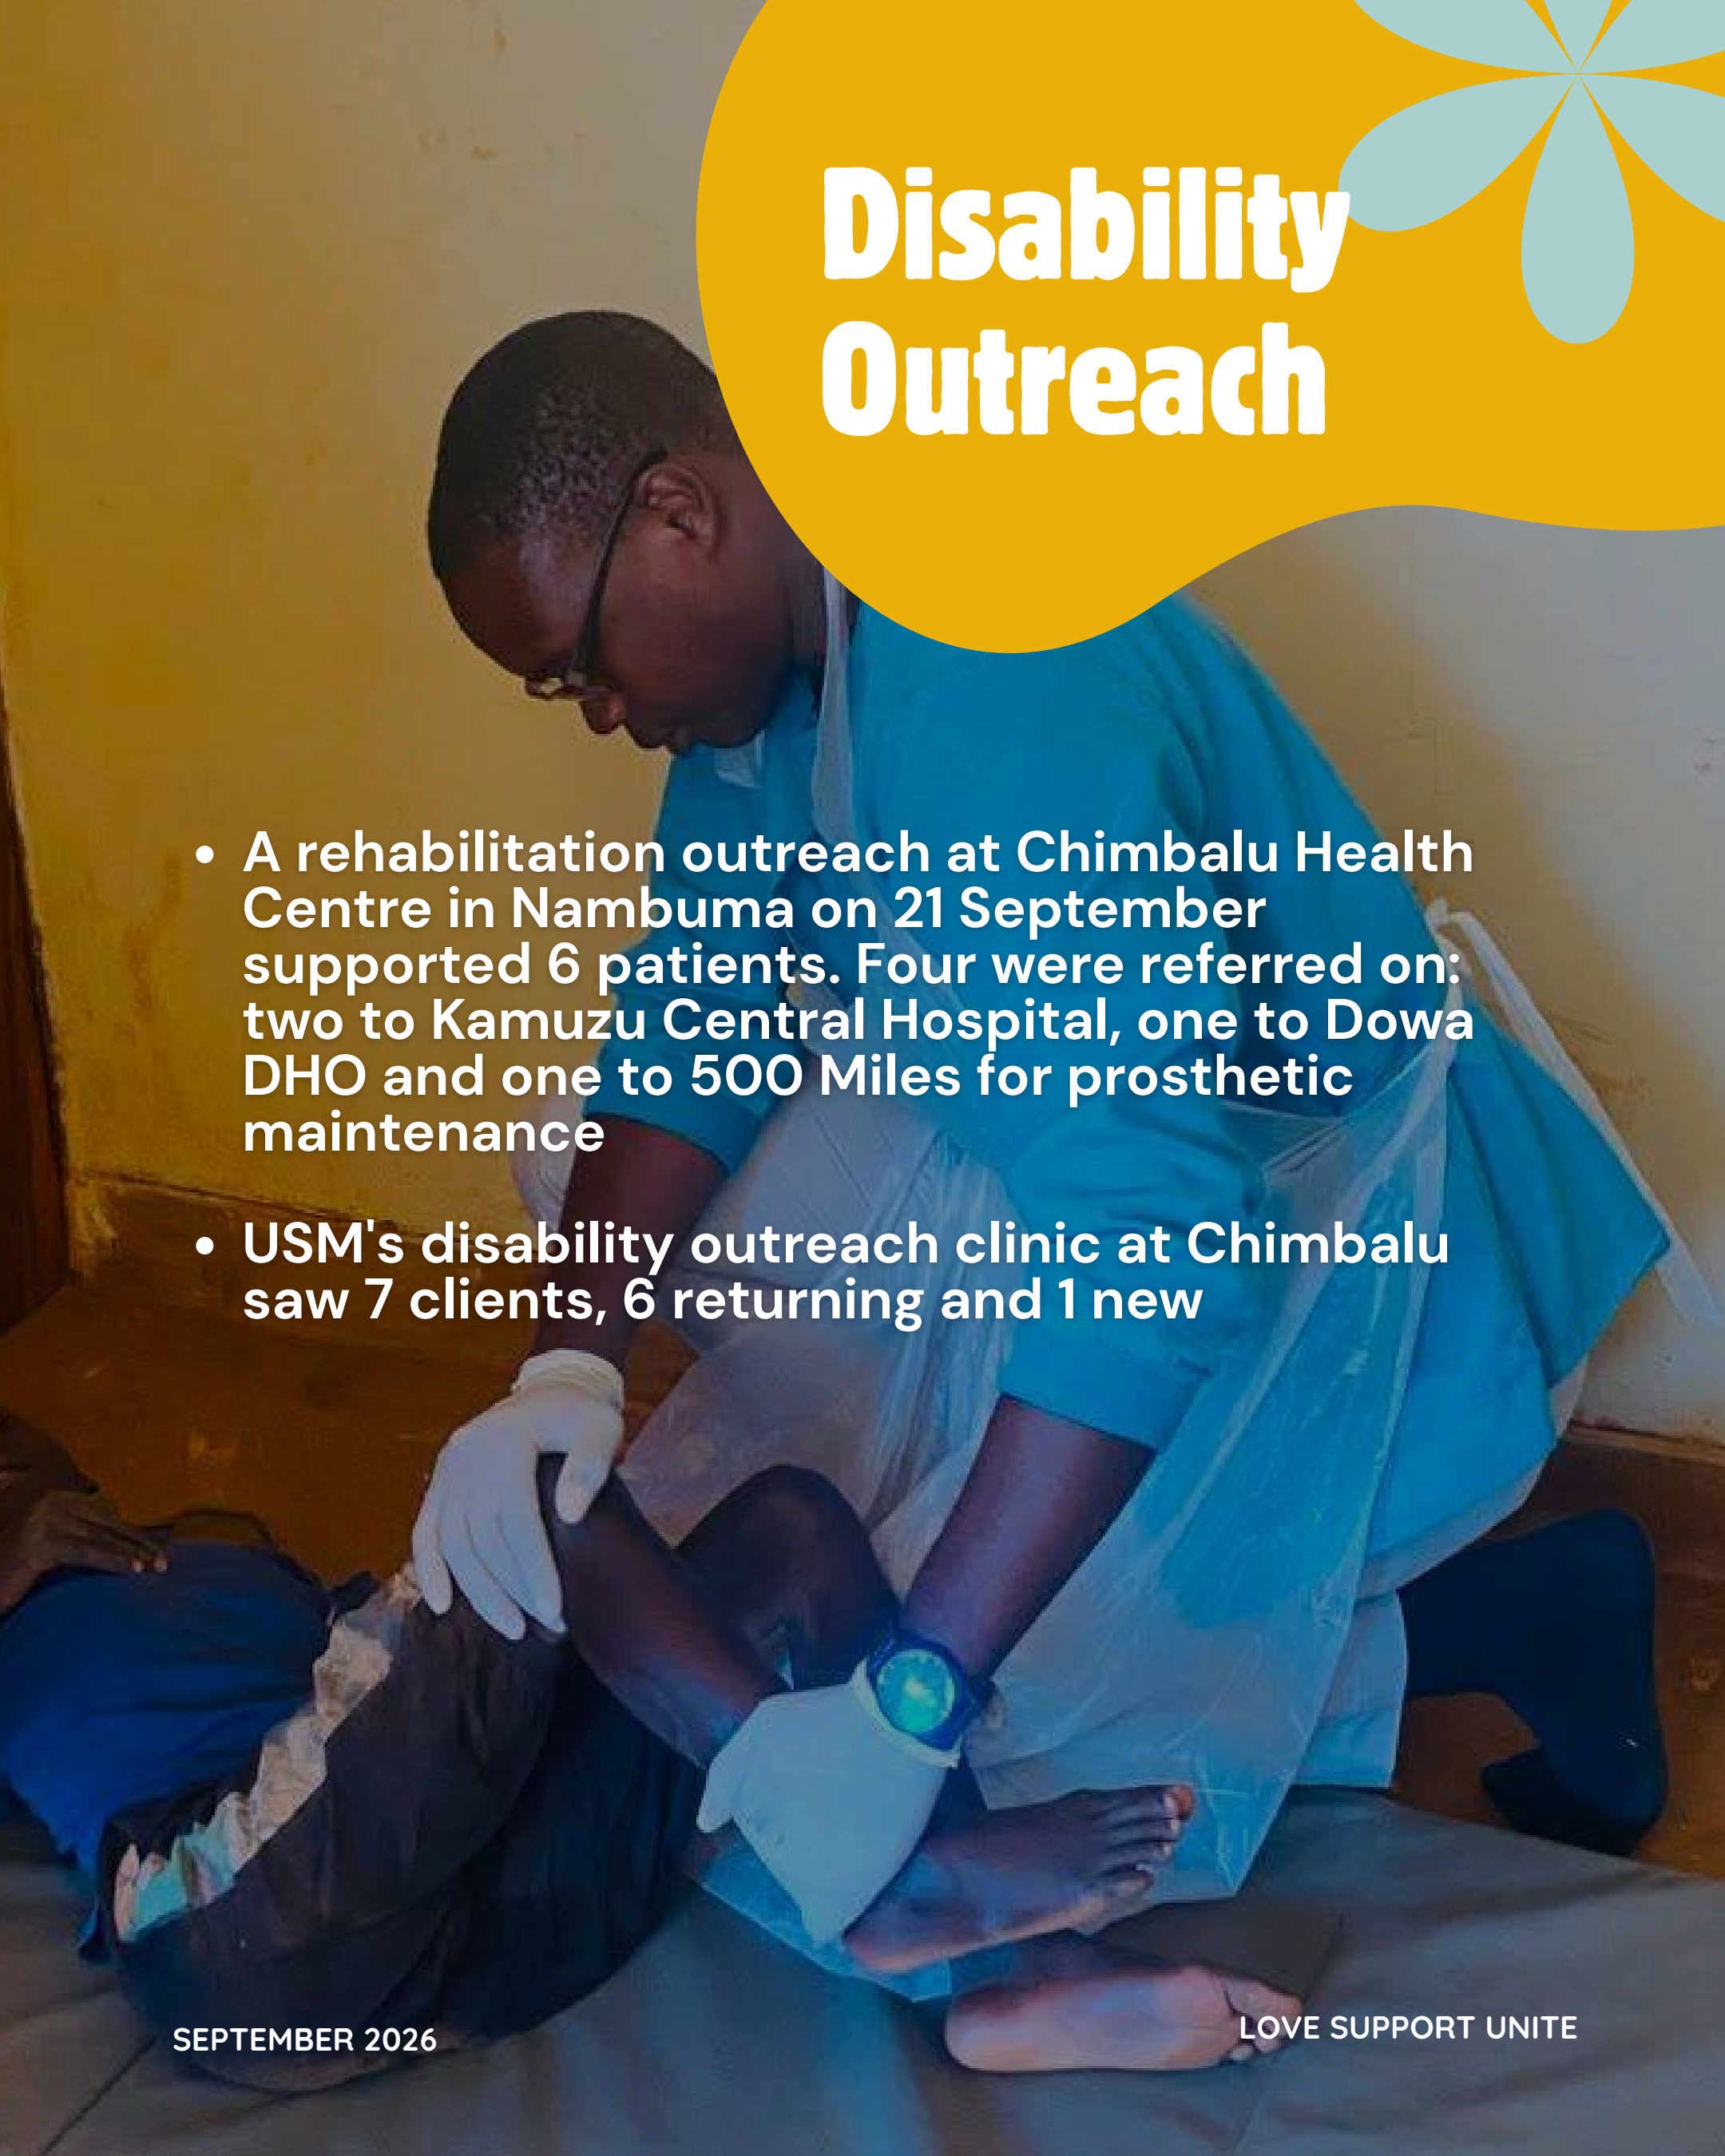

Mobile Outreach Clinics

- 159 malaria rapid tests were done, with 3 positive results
- 50 people received HIV counselling and testing, with no reactive results, and 211 self-test kits were distributed
- On one day, health workers from Bwaila Hospital and the local Member of Parliament joined the clinics at Mkhwangwa and Mkhukhu, where 274 clients received care
- Health education covered immunisations, birth preparedness, family planning, danger signs in pregnancy, antenatal care, hygiene, measles and HIV prevention

Safe Motherhood: Antenatal Care

- 39 antenatal visits took place, 15 of them first-time visits, up from 28 in August
- 16 treated mosquito nets were given to expectant mothers, more than double August's 7, as well as iron tablets (39), malaria preventive treatment and tetanus vaccinations (18)
- On 14 September, the SEND unit gave a health talk at the antenatal clinic covering healthy habits in pregnancy, a father's role, the dangers of labour-inducing herbs, and how families can support a child with a disability. The expectant parents asked many questions, and the team hopes this will reduce stigma and family separation

Disability Outreach

- A rehabilitation outreach at Chimbalu Health Centre in Nambuma on 21 September supported 6 patients. Four were referred on: two to Kamuzu Central Hospital, one to Dowa DHO and one to 500 Miles for prosthetic maintenance
- USM's disability outreach clinic at Chimbalu saw 7 clients, 6 returning and 1 new

SEND Rehabilitation Unit: M'bang'ombe Health Centre

- 25 children attended the unit in August, 5 of them newly enrolled. This brings enrolment to 20%, up from 19.2% in July
- Most of the children seen were living with cerebral palsy (15 of 25)
- All 9 babies born at the maternity ward with complications this month were assessed for developmental follow-up, a 100% assessment rate, and are now on a follow-up schedule
- A rehabilitation outreach at Ngoni Health Centre on 17 August supported 4 children, with no tertiary referrals needed

Key achievements

- 100% assessment rate for babies born with complications
- A child reached the milestone of sitting independently
- Wheelchair secured for a child starting school
- Partnership exploration with Fount for Nations

Sustainable Family Farms

A single mother living with a disability in Ngwizi village harvested 25 bags of maize through the programme. She repaid 10 bags of her loan and kept 15 for her family. She is now graduating from the Orphan and Vulnerable Children programme, a clear example of the no-interest loan model helping a family move from support to self-reliance

Orphan and Vulnerable Children Project

- The team visited a family in the programme to deliver a food package and bedding after the family reported cold weather and a lack of food
- A radio was delivered to a 67 year old man in the programme, and a tricycle was provided to a single mother to support her mobility
- Quarterly food pack distribution to enrolled households is scheduled for October

**Thank you to everyone who
made September possible,
from the teams on the ground
in Malawi to our supporters
back home.**

**Thanks to you, care reached
more families, and stories of
real progress kept unfolding!**

THANK YOU!
